

**For Immediate Release**

**Latitude Technologies announces ultra light SkyNode Email Gateway  
aeronautical office solution**

Latitude Technologies of Victoria British Columbia announces today the SEG100 SkyNode Email Gateway providing WiFi aeronautical email access for crew and passengers. The SEG100 is designed for use with the industry proven, cost effective SkyNode S200 Satcom voice/data systems. Wireless cabin email access is provided to users of laptop computers or any WiFi capable device, including the iPhone and BlackBerry, in the smallest, lightest, most cost effective platform available anywhere. Connected via RS-232 to the SkyNode S200, the SEG100 router handles email through the globally available Iridium network. Weighing less than a pound the SEG100 automatically provides WiFi enabled mobile-office-in-the-sky services. Just turn on your mobile device and get productive!

To see the new SEG100 please visit us in Booth 4719 at the NBAA in Orlando, Florida October 20-22, 2009 and Booth 1031 at the AMTC in San Jose, California October 26-28, 2009.

**About Latitude Technologies**

Latitude Technologies Corporation, headquartered in Victoria, British Columbia, is a global supplier of aeronautical voice and data equipment and services. Our products include the smallest, lightest, most versatile and economical to operate 2-way data networking and messaging devices in the world. Latitude products are supported by the LWS Sentinel™ data reporting, messaging and flight following service.
